## CJ TEMPORARY HOSPITAL BED

Using our state of the art digital cutting equipment, CJ is producing temporary hospital beds to assist with the growing needs of the healthcare system. These beds allow for access acute care services above and beyond the constraints of traditional temporary alternatives. Easy to assemble without tools, CJ Temporary Hospital Beds grant immediate relief for a common bottleneck in medical and healthcare services. Made of high-density extruded polystyrene foamboard with high-impact styrene faces, these beds are not only strong but easy to clean and sanitize between patient uses. These new beds also feature easy-access openings for cleaning underneath as required by Health Canada. CJ Temporary Hospital Beds are simple to assemble and require no additional tools or equipment to construct on-site. CJ always has sustainability in mind by using non-hazardous and recyclable materials for the entire construction, CJ Temporary Hospital beds can be easily disassembled after use without any concern of environmental impact. Combined with immediate availability and customizable nature, there is a CJ Temporary Hospital Bed to suit any demand.
