CJ FACE SHIELDS

Our team at the CJ Group of Companies is always working to provide innovative solutions to help keep everyone safe and healthy, especially our frontline care workers.

The new CJ Face Shields are designed to reduce risks by protecting critical areas that are vulnerable to contamination. By protecting the user's face from splashes and aerosol droplets, the durable polycarbonate construction reduces community transmission and contagion. CJ Face Shields can be comfortably layered with other forms of Personal Protective Equipment (PPE) by utilizing hook-and-loop fasteners for maximum adjustability. Employing a floating shield with a vented design, CJ Face Shields are both fog-resistant and can accommodate the presence of N95, surgical, and other forms of face masks. Being reusable and easy to clean, these shields offer long-term protection to assist health care workers and facilities that have regular interactions with contaminated droplet exposure. The CJ Group of Companies is dedicated to meeting the needs of healthcare professionals and anyone looking to keep safe while conducting an essential service.

SALES POINTS

- Polycarbonate construction ensures resilience and durability
- Reduce risk by protecting critical areas that are vulnerable
- Usage strongly recommended by Canada Public Health
- Protection from splashes & aerosols
- Impermeable barrier provides droplet protection
- Larger protective area when compared to safety glasses
